General machining and metal fabrication processes using stationary machine tools; (lathe, mill, drill press, and grinders)

- Cuts, contusions, lacerations, from contact with point of operation or associated flying materials from work part.
- Hearing damage from audible noise above 90dB at a sustained level:

Hours per day	Sound level	
8	90dB	
6	92dB	
4	95dB	
3	97dB	
2	100dB	
1.5	102dB	
1	105dB	
.5	110dB	
.25 or less	115dB	

- Students, staff, and faculty using the machine shop must have prior authorization and complete the CNS machine shop safety online training. Go to this link for training, https://cnssafety.ucdavis.edu/machine-shop-safety
- Use tools according to manufacturer's recommendation.
- Understand use of tools and procedures before commencing work.
- Use correct tool for the job and ensure that tools are in good condition before starting work.
- Report any defect tool or machine to Safety Manager.
- Use the guarding systems and shields.
- Do not defeat guarding systems

- Long pants, Non-slip, Closed-Toe Shoes
- Dust Mask
- Goggles/Safety Glasses
- Remove jewelry from hands and neck, tie back hair, roll up long sleeves and secure any other loose clothing that could potentially get caught in moving equipment.
- Wear hearing protection.
